- Low-cost "thin client" network computer
- Zero administration at the desktop
- Runs only 100% pure Java applications
- Write once, run anywhere
- Ease of application distribution across the enterprise
- Enhanced security
- 100-MHz microSPARC-II for workstation-class performance
- 10Base-T for workstation-class bandwidth

### JAVASTATION SYSTEM

The JavaStation is offered with 5 memory configurations and 7 initial Country Kits. All Country Kits contain a North American keyboard with a localized power cord.

### MONITOR OPTIONS

Three monitor choices are available: 14" color, 17" color, and no monitor (headless config.)

### SOFTWARE

*Sun is offering the first versions of the JavaStation Software Environment free of charge. This software contains JavaOS, HotJava Browser and JavaStation boot services and administration tools. The software is be available through the Web (<http://www.sun.com/javastation>). Note that it is necessary to install this software package on a server running Solaris 2.5 in order to run the JavaStations in a network.*

The second version of the JavaStation Software Environment, which will include Sun's extended desktop user environment, HotJava Views, will be available in Q3FY97. The software will be distributed on a CD and through the Web. Pricing to be announced.

### OPTIONS

The only option offered with the JavaStation is an X-option memory upgrade. This option is intended as a post-purchase option and should not be used for initial orders. Ordering memory as part of the system will ensure that the memory arrives preinstalled.

### GENERAL ORDERING NOTES

**Licenses** - The JavaOS and HotJava Browser license come standard with every system.

**Media** - The JavaStation pulls all its software from a local boot server over the network. One copy of JavaStation Software Environment is required per site. This environment requires a Sun server running Solaris 2.5 or a Netra j server in each subnet.

**Memory** - JavaStation has a total of 4 available memory slots. 8MB configuration uses 2 x 4MB SIMMs and 2 slots; 16MB configuration uses 4 x 4MB SIMMs and all 4 slots; 32MB configuration uses 2 x 16MB SIMMs and 2 slots; 40MB configuration uses 2 x 4MB and 2 x 16MB SIMMs and all 4 slots; 64MB configuration uses 4 x 16MB SIMMs and all 4 slots. SIMMs must be added in pairs of equal capacity.

## SPARCstation 5 - Model 170

### *Model 170 with One 170MHz TurboSPARC processor:*

Part Number	Description	List Price	Discount Category
S5RX1-170-32-P17	17" entry color monitor, TurboGX, 32MB, 2.1GB internal fast SCSI-2 disk	\$4,695	A
S5F24-170-32-P17	17" color monitor, S24 graphics, 32MB, 2.1GB internal fast SCSI-2 disk	\$5,195	A
S5FX1-170-32-P17	17" color monitor, TurboGX, 32MB, 2.1GB internal fast SCSI-2 disk	\$5,195	A
S5FX4-170-32-P17	17" color monitor, TurboGXplus, 32MB, 2.1GB internal fast SCSI-2 disk	\$6,195	A
S5T24-170-32-P17	20" color monitor, S24 graphics, 32MB, 2.1GB internal fast SCSI-2 disk	\$5,895	A
S5TX1-170-32-P17	20" color monitor, TurboGX, 32MB, 2.1GB internal fast SCSI-2 disk	\$5,895	A
S5TX4-170-32-P17	20" color monitor, TurboGXplus, 32MB, 2.1GB internal fast SCSI-2 disk	\$6,895	A

#### NOTES:

- Requires Solaris 2.3, Hardware: 5/94 or higher. Solaris 1.1.1 version B is available for TurboGX and TurboGXplus models.
- All system orders that include a monitor must also include a Country Kit; refer to the "Country Kits" section of the End User Price Book.
- For AUI Ethernet support, order the AUI adapter cable (X981A).
- The Solaris Internet Access PlusPack (IAPP-2.0-P) can be ordered at no charge with initial Workstation order.

### *Upgrades to SPARCstation 5 - Model 170:*

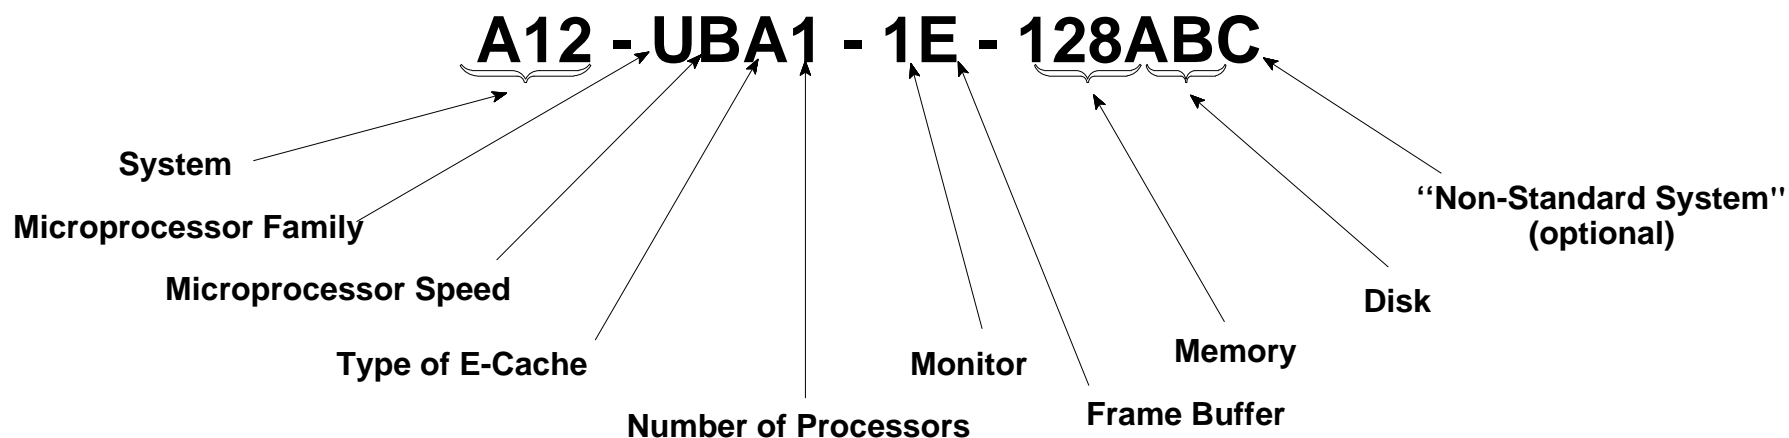

From	Part Number and Description	List Price	Discount Category
SLC, ELC, IPC, SPARCstation 1/1+, Classic	<b>UGFS-S5RX170-P17</b> Full system upgrade to SPARCstation 5 Model 170 with modified system enclosure, 17" LC color monitor, TurboGX, 32MB, and 2.1GB internal fast SCSI-2 disk.	\$4,495	A*
SLC, ELC, IPC, SPARCstation 1/1+, Classic	<b>UGFS-S5FX170-P17</b> Full system upgrade to SPARCstation 5 Model 170 with modified system enclosure, 17" color monitor, TurboGX, 32MB, and 2.1GB internal fast SCSI-2 disk.	\$4,745	A*
SLC, ELC, IPC, SPARCstation 1/1+, Classic	<b>UGFS-S5TX170-P17</b> Full system upgrade to SPARCstation 5 Model 170 with modified system enclosure, 20" color monitor, TurboGX, 32MB, and 2.1GB internal fast SCSI-2 disk.	\$5,445	A*
IPX, LX, SPARCstation 2, SPARCstation 10	<b>UG4/75-S5170-P17</b> Chassis upgrade to SPARCstation 5 Model 170 with modified system enclosure, TurboGX frame buffer, 32MB, and 2.1GB internal fast SCSI-2 disk.	\$4,095	A*
IPX, LX, SPARCstation 2, SPARCstation 10	<b>UGS2-S5TX4170-P17</b> Chassis upgrade to SPARCstation 5 Model 170 with modified system enclosure, TurboGXplus frame buffer, 32MB, and 2.1GB internal fast SCSI-2 disk.	\$4,695	A*
SPARCstation 4, SPARCstation 5	<b>UG-S4-S5-TX1-170</b> Chassis upgrade to SPARCstation 5 Model 170 with modified system enclosure, TurboGX frame buffer, no memory, no disk.	\$2,795	A*
<b>BOARD UPGRADE</b>			
SPARCstation 5 70, 80, or 110MHz System Board	<b>UGS5-70/85/110-170</b> Upgrade to SPARCstation 5 170MHz System Board with CPU.	\$995	A*

#### NOTES for Upgrades:

- Requires Solaris 1.1.1 Version B or later, Solaris 1.x release, or Solaris 2.3. Hardware: 5/94 or later
- Additional memory, internal or external storage options must be ordered as separate line items.

\* Maximum discount may apply.
